An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, line 3, after "U.S. Patent No." insert --6,688,961--.

The following is an examiner's statement of reasons for allowance:

The claimed method for apportioning poultry breast having a weight greater than about 16 ounces is believed to be in condition for allowance and is being passed onto issue. The prior art of record does not anticipate nor is obvious with proper teaching(s) the claimed method. More specifically, the method includes the step of providing by cutting, primary, teardrop emulating shaped meat product from the region of each side portion. The novelty of such a step involves from the critical need in the meat producing industry to provide its suppliers with exact size and weight meat portions. The suppliers require such meat portions in order to meet the needs of their customer base who have dramatically increased their consumption of various types of poultry meat products over the last decade or so. The Applicant's method is a novel way of cutting a poultry breast to meet the industry needs of exact sized and weight meat portions, and to increase marketability of its primary meat portions, such as the poultry breast, in a profitable way for the meat processors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
